

ABSTRACT

An object of the present invention is to provide a PC card having four SD memory cards therein, which maintains the positional accuracy of the SD memory cards and connectors, and has high contact stability. The PC card includes in its case a printed circuit board (3), connectors (4) secured to the printed circuit board (3), and pressing members (6) secured to the printed circuit board (3). The pressing members (6) hold two SD memory cards respectively, while pressing them to the printed circuit board (3) and the connector (4).
